DIV. OF OIL, GAS & MINING

Subject: Permit Mailing Error

Dear Mr. Cason:

The Division of Solid and Hazardous Waste (Division) completed its review of the U.S. Gypsum permit renewal application for the Jumbo Class IIIb Landfill. On September 18, 2002, the Division determined the application was complete and sent a draft permit for U.S. Gypsum's review. Mr. Kyle Morris, quarry/mill manager, provided comments, which resulted in modifications to the draft permit.

The Division published the draft permit, with the modification, and began the public comment period. No comments were received and public comment period ended November 21, 2002. No changes were required to the published draft permit.

Accordingly, on January 16, 2003, the draft permit was finalized, signed, and mailed to you. In error, the permit that was sent to you included the earlier draft version that was submitted to you for comments on September 18, 2002. Enclosed are the correct pages of your permit, which were published for the public comment period. Please remove page two and beyond of the permit which was mailed to you and replace them with the enclosed pages. Please make sure all copies of the permits in your possession contain the enclosed permit pages.

Please excuse our error. The Division appreciates the working relationship with U.S. Gypsum. If you have any question, please call Jeff Emmons at 801-538-6748.

Sincerely,

Dennis R. Downs, Executive Secretary  
Utah Solid and Hazardous Waste Control Board
